

Project Landscape Architect Position

Áit Urbanism + Landscape Ltd. is an award winning Landscape Architecture and Urban Design Practice company based in the historic Liberties area of Dublin 8. We have an excellent opportunity for a Project Landscape Architect to join our growing team. The ideal candidate will have a minimum of 5 years' experience in the private sector, show a passion for design, landscape architecture, green infrastructure and public realm design, and most importantly be a team player. Shortlisting of candidates will be based on submitted portfolio. We will be looking for an excellent standard of design skill and flare, communication and graphic presentation skills.

The successful candidates will have a unique opportunity to further develop their knowledge and design skills working on a dynamic range of projects from design through to on-site completion. We have a diverse portfolio of clients and projects in Dublin City and throughout Ireland. Our projects include public sector work in the areas of public realm design, public consultation, green infrastructure and feasibility studies, master planning, detailed bespoke design, as well as preparation of tender packages and supervision of vast array of projects on site.

Private sector work involving all stages, across a broad spectrum of project types such as social housing, student accommodation, hotel developments, residential, office and retail schemes. We are also involved in a number of green infrastructure projects including green infrastructure strategies, design of greenways along various canal routes, LVIA's and production of landscape reports and assessment.

The senior post requires a skilled landscape architect working in a recognised landscape and urban design practice. This role will require the project management of a number of small and medium to large scale projects from conceptual design to supervision on site. Excellent verbal and communication skills (English) are required in conjunction with excellent design and graphic skills; knowledge of the Irish Planning System would be beneficial.

Covid-19

Ability and capacity to work remotely is required during any travel restrictions. We are open to a flexible approach of remote and office based work. The successful candidates must be fully vaccinated and have a Covid Travel Certificate.
